Troy has worked for me for 18 years and developed into the best Project Superintendent I have ever had. If we were not shutting down Silvertown Troy would have many more good years with us. His honesty and integrity are of the highest level. He has a full knowledge of reading the plans and specs including MEP and structural. Troy has developed computer skills that have become most important in today's environment. We achieved substantial completion on Bass Hall on 15 Jan 09 and all punch list items are now complete. Troy is currently finishing up some late change orders and he can be available for employment sometime in Mar 09.

I would be more than happy to visit with you anytime about Troy's construction knowledge and abilities.

OBJECTIVE

Seeking employment in a Managerial/Superintendent Position with a Commercial Construction Company.

- I have worked full time in the Construction Industry since 1975. Started in Construction as a Laborer working on Corps of Engineer Project in Texas City, Texas. Throughout the following years I worked on various Construction Projects learning through "hands on experience" all aspects of the different trades and crafts involved with Commercial Construction. This experience led to me being employed as a Project Superintendent for the last 18 years with Silverton Construction Co., Inc.

QUALIFICATIONS

A successful Project Superintendent on Projects that not only were high profile, but several had nearly impossible schedules along with very limited access and nearly all of the projects with Silverton Construction Company were renovations or additions to existing facilities that required a high level of coordination of deliveries, work operations/schedules, and working hand in hand with owners in order to provide the least amount of disruption to ongoing occupation of the facilities.

- Carries a reputation of being well respected within the subcontractor community and recognized as being tough but fair.
- Has a proven record of:
 1. Honesty above reproach.
 2. Willing to work long hours doing whatever it takes to complete the project safely, on time, and within budget.
 3. Not making excuses to cover up any mistakes, but working immediately on a corrective solution and implementing such solution in the most time/cost effective method available.
 4. Very knowledgeable and experienced with Closeout and Commissioning Requirements for University of Texas Construction Projects.

I would appreciate the opportunity to not only provide the same services to your company as I have provided to previous employers, but to also serve your company in any higher capacity that I can prove myself worthy of.

Respectfully, Troy A. Starr
