**Apprenticeship:  
Sheetmetal**

## Is Sheetmetal For You?

Are you a visual person? Do you enjoy mechanics and fitting puzzles together? Sheet metal workers cut and mold sheets of metal into products for installing and repairing ventilation and air ducts. They also construct airplanes, automobiles and billboards. Most sheet metal fabrication shops are completely computerized, so sheet metal workers may be responsible for programming control systems on various pieces of equipment.

### Average Salaries\*

\$58,160

annually

\$27.96 per Hour

\*Average base salary does not include overtime or incentives

# Program Overview

## Foundations for your Career

CORE program  
(Basic Safety, Hand/Power Tools,  
Construction Math, Communication &  
Employability Skills)

Overview of Sheet Metal Industry

Tools, Equipment, Math &  
Measurements, Construction Drawings

Ductwork, Air Distribution Systems

Arc Cutting, Soldering, Fabrication,  
Welding & Brazing

Fume & Exhaust System Design

**4 level Sheetmetal Curriculum to  
complete Apprentice Program.  
Course requirements are updated  
regularly to meet industry  
standards.**

## On-Site Training

In addition to classroom instruction, students will complete 8,000 hours of On-The-Job Training, PAID! Apprentices must remain employed by Sponsor Employer for the duration of their studies and meet graduation requirements.
